A. Read the passage below carefully.**Owls**

1 Have you ever seen an owl? Owls are birds, but they have many special features. Let's have a look!

Owls have round faces. Unlike most birds, both of their eyes face forwards like us. However, they cannot move their
5 eyes. They must turn their heads when they want to look at different directions. In fact, they can turn their head almost to their back!

Owls are nocturnal animals. It means that they are active during the night and sleep during the day. They rely on good
10 hearing and eyesight to catch preys. They can catch their preys even in complete darkness! They usually hunt insects and small animals such as mice. Some owls also catch fish for food.

Most owls live in tree holes
15 instead of nests. So, when you hear the sound 'hoo-hoo' next time, look for tree holes around you. You may see an owl inside!

Read the sentences. If it is true, write 'T'. If it is false, write 'F'. (6% @ 2%)
